

Getaround Connect™

Getaround is a peer-to-peer carsharing community

that empowers people to rent, locate, and unlock great cars instantly from their phone. Combining our patented connected car technology, the Getaround Connect™, with top-rated insurance coverage backed by Assurant, Getaround creates a seamless and fun, sharing experience. It's free to join and for as little as \$5 an hour, members can conveniently rent nearby cars or share their own car, offsetting the cost of monthly payments, insurance and maintenance.

Connecting cars for the sharing economy

Designed for sharing

Built and designed in-house to create a seamless carsharing experience. Connect™ lets users locate and unlock shared cars right from their phone, making sharing as convenient as ownership.

Any car, connected

Easily installed, Connect™ can turn any car into a connected, shared resource. Getaround is bridging the gap between the future of transportation and the billions of cars already on the road.

Safe and secure

Connect™ provides additional security protection when sharing cars including GPS tracking, tamper protection, immobilization and encrypted data exchange over secure cellular networks.

Getaround Connect™ technology

Data and diagnostics

Data collected provides details on each trip, as well as aggregated data used by government and academia to study the impact of carsharing in local communities.

Bluetooth LE

Bluetooth integration allows access to Getaround cars in locations with unreliable cellular reception, like multilevel garages and remote locations.

API - coming soon

Seamless integration with third party apps, while providing the opportunity for car enthusiasts and developers to contribute to the Getaround platform.

CASE STUDY

Studying carsharing in Chicago

© Elliott Hutchison

Getaround was awarded a Federal grant to study the positive impact of carsharing.

STUDY DETAILS

Getaround launched a two-year carsharing pilot program in Chicago starting August 2015 in partnership with the Shared Use Mobility Center for Neighborhood Technology.

The study is funded through a \$715,000 grant awarded by the Federal Highway Administration and implemented by the Illinois Department of Transportation and the Chicago Department of Transportation.

GETAROUND IMPACT

This groundbreaking Federal study relies on Getaround's Connect™ technology to collect anonymized trip data, which will be analyzed and interpreted to help inform future policy and program decisions in the Chicago area and beyond. This study will explore the real impacts of peer-to-peer carsharing, including the number of ways residents move around, while limiting congestion, improving air quality and reducing CO2 emissions.
